

VISCON CONNECT

SMART SERVICE SUPPORT

Viscon Connect is a high-end connectivity device designed to offer easy remote access to your machines on site. Our service technicians can quickly analyze and resolve possible issues. This provides peace of mind: your technician is always at your disposal.

Remote access

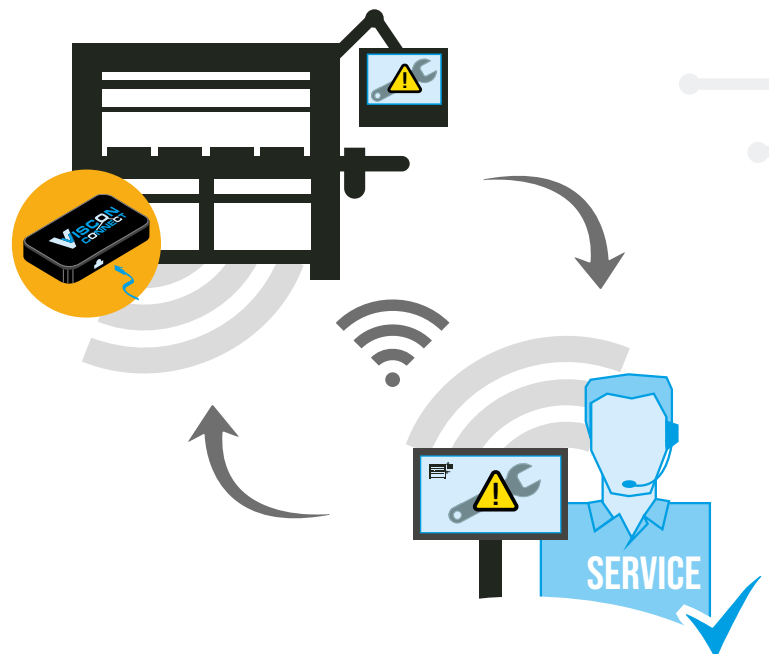

With Viscon Connect our service technicians can act quickly in the event of any possible malfunction. By the usage of an internet connection it is possible to connect almost any machine. This enables the service department to support from distance to PLC and HMI to analyze the malfunction.

Easy of use

The Viscon Connect is a minicomputer that is equipped with all possible software that is needed to make connection with your machines. All you need is a stable internet connection at the location of the machine. Viscon Connect can be used to replace existing analogue connections such as telephone modems and Sheeva modems. If you want to learn more on Viscon Connect, please contact our service technicians. We are happy to help you.

WHY VISCON CONNECT:

- ✓ Malfunction remote analysis, saves time, labor and travel costs.
- ✓ Worldwide support
- ✓ Fast and reliable connection
- ✓ Replaces all current "dial-up connections"
- ✓ No tricky installation procedures; **plug and play!**

product handling systems

The logo features a large, stylized 'V' on the left, composed of two overlapping blue shapes. To its right, the word 'VISCON' is written in a bold, white, sans-serif font. Below 'VISCON', the word 'CONNECT' is written in a smaller, white, sans-serif font. The letters 'C', 'O', and 'N' in 'CONNECT' are partially overlaid by a light blue graphic element that extends from the 'V' and the 'O' in 'VISCON'.
