

Converting data into value

Turning insights into action

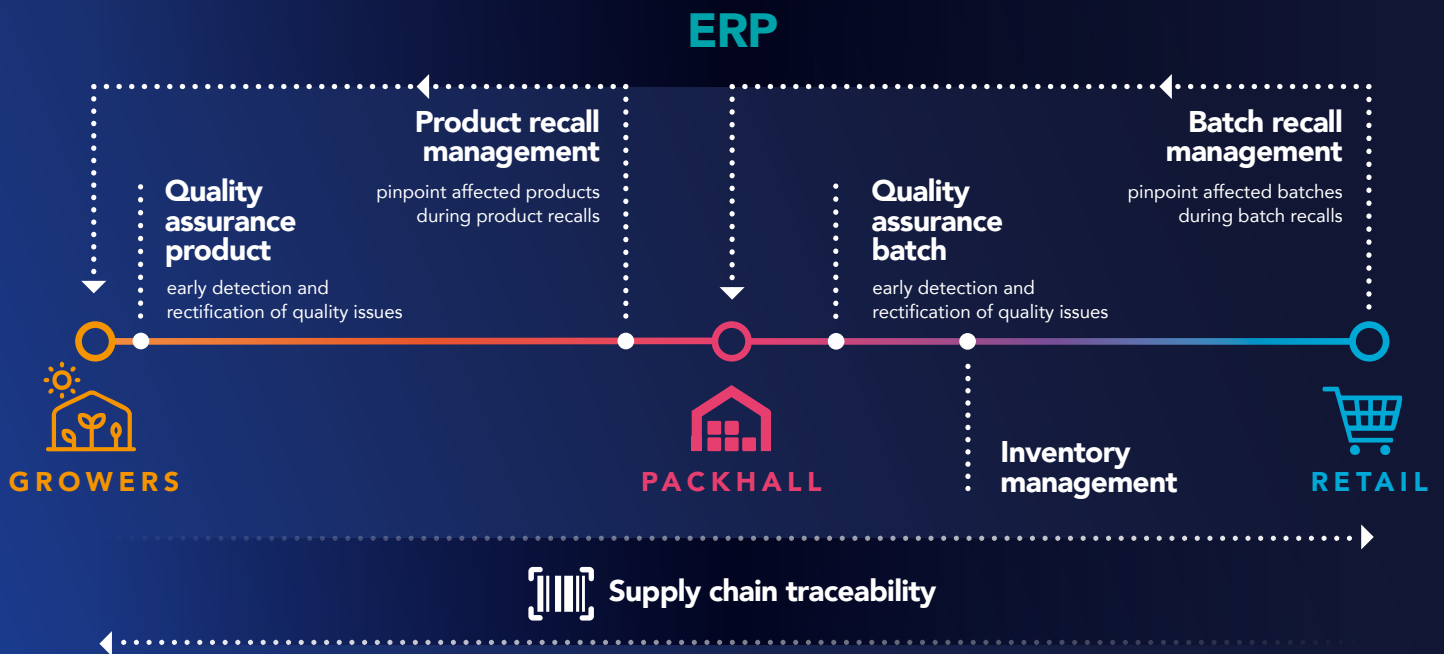

Empowering the Fresh Produce market with advanced tools for product recall management and food safety. By seamlessly integrating with ERP systems and providing real-time supply chain traceability, the software ensures rapid identification and resolution of safety issues, compliance with regulatory standards, and enhanced transparency. Viscon Factory Intelligence software solutions transforms operational data into actionable insights.

Enhancing packhall automation with data-driven solutions

Automated workflows, integrated quality control, and predictive analytics ensure consistent food safety, while efficient recall processes minimize disruptions and safeguard consumer trust. With these tools, Viscon transforms data into a powerful asset, fostering accountability, operational efficiency, and continuous improvement.

Ensuring food safety and product recall precision

Viscon Factory Intelligence software ensures robust food safety through integrated quality control, and real-time traceability. These features enable precise monitoring of product conditions and swift identification of potential safety risks. In the event of a recall, the software's detailed track & tracing options quickly pinpoint affected products, ensuring rapid resolution with minimal disruption. By maintaining detailed records and streamlining compliance with regulatory standards, Viscon not only safeguards consumer trust but also reinforces operational resilience in the face of challenges.

Integrating cutting-edge tech with realtime data-driven insights

Driving production transparency with supply chain traceability

Viscon Factory Intelligence software provides end-to-end visibility across the supply chain, enabling real-time tracking of products from origin to destination. This ensures accountability, supports quality assurance, and enhances operational efficiency. By integrating seamlessly with ERP systems, the software delivers actionable insights, helping you to maintain transparency, meet regulatory standards, and build consumer trust.
