

# Because lifting pallets isn't the same as lifting performance.

WE DO BOTH.

## Automated intralogistics for a thriving tomorrow.

In today's fast-paced warehouses, efficiently moving pallets between multiple levels is a constant challenge. Traditional lifts and manual handling often limit throughput and increase operational costs. Viscon's VertiTransfer is a high-capacity, versatile vertical transport system designed to optimize space and workflow. With precise positioning and seamless integration into multi-level warehouses and mezzanines, it keeps goods moving smoothly and safely, handling diverse pallet sizes and weights with reliable, high-speed performance.

### Viscon's vertical pallet transfer solutions

The VertiTransfer handles pallets up to 1,500 kg with precise positioning, supports multiple pallet sizes, and reaches transport heights up to 30 meters. Compact design allows seamless integration with existing conveyors, forklifts, and warehouse infrastructure.

MULTI-LEVEL PALLET HANDLING

## Reliable vertical transport to elevate your business

### Maximizing efficiency in multi-level pallet handling

This integrated vertical transport solution delivers optimized performance, allowing warehouses to save space, increase throughput, and minimize manual handling risks. Engineered for reliability, the VertiTransfer supports continuous operation with a capacity of up to 90 pallets per hour, making it ideal for operations with high pallet turnover or multi-level storage requirements.

#### Maximized space utilization

Compact footprint allows integration into any warehouse or mezzanine layout, optimizing vertical storage potential.

#### Versatile and flexible design

Configurable to handle multiple pallet sizes and weights, as well as diverse operational requirements such as assembly, packaging, and sorting.

#### Seamless warehouse integration

Compatible with existing conveyors, forklifts, and material handling equipment, ensuring smooth and safe infeed and outfeed at each level.

#### Safety-first operation

Equipped with light screens, safety fencing, and gates, the VertiTransfer minimizes risk while maximizing uptime.

The integrated control system ensures precise positioning, smooth operation, and reliable throughput, making it a dependable component of high-density, multi-level warehouse systems.

#### Capacity:

up to 90 pallets/hour

#### Weight range:

up to 1,500 kg

#### Maximum transport height:

30 meters

*(single-piece column: up to 9,100 mm)*

#### Material:

steel, corrosion class C1, IP54 rating

#### Operating temperature:

+5°C to +40°C

Scalable, flexible  
design to grow  
your business
