and grow

# Lettuce moss ball

A unique product that is aimed at all consumers, not just keen gardeners, as the Dipz & Grow ball only needs to be soaked in water with no additional input from the consumer. It is also very topical, as the ball is totally organic and therefore the consumer will be able to harvest chemical free, very flavoursome lettuce. The Lettuce ball can be raised in any home on a windowsill or small patio or veranda.

## Lettuce moss ball

The lettuce moss ball is the easiest ever way to grow your own fresh, nutritious, organic crisp and crunchy baby leaves. This unique mixture will be ready for harvesting from as little as 39 days and has been selected to touch every taste and texture sensation; bitter, sweet, tangy & crunchy.

The lettuce moss ball is packed full of nutrients, making the tasty salad ever perfect, complimented with a little olive oil and lemon juice. Worlds apart from the soggy supermarket salads, which you will probably never buy again.

Main benefits of the lettuce moss ball are:

- ✓ Perfect for growing a continuous supply of fresh, organic, crisp and crunchy baby leaves.
- ✓ It can be grown on any balcony, patio or sunny windowsill.
- ✓ Easy gardening for everyone, just dip and grow.

# The Vertical Garden

## The Vertical Garden

It's very easy – with no garden experience necessary. The consumer needs to immerse the Vertical Garden in a large bucket full of water. After this, one can insert one small, well-rooted plant per pre-cut hole and two plants in the top. Water thoroughly until drips appear from the bottom drainage holes and lay the planter in a well-lit, frost-free position for approximately 4 weeks, then hang in a sunny final position when all risks of frost have passed.

### Main benefits of the Vertical Garden ball are:

- ✓ Flower bag includes sustainable coco compost and slow release fertiliser.
- ✓ A colourful addition to patios, balconies, fences and walls.
- ✓ Suitable for a wide range of colourful plants.
